// profile PROFESSIONAL SUMMARY

Senior Backend Engineer with 4+ years of experience designing and shipping production systems across **banking (core loan / credit card)**, **QRIS payments**, and **EDI supply-chain automation**. Deep expertise in **Java / Spring Boot microservices** — crafting scalable, secure, and observable services that reliably process thousands of daily financial transactions. Proven track record in Linux/cloud deployment, B2B data exchange (EDIFACT, SFTP, AS2), and hardening systems with Spring Security, OAuth 2.0, JWT, and encryption.

// experience WORK EXPERIENCE

Back End Developer @ PT EDI Indonesia

On-site • Jakarta

Oct 2025 – Present

- > Design and build **Java backend services** automating B2B purchase-order (PO) processing for **7+ buyers** (Alfamart, Alfamidi, Alfabea, LSI/KCM, KCSOFTX, FFI, Nestle, CCEP, P&G) into standardized **EDIFACT ORDERS D:96A** documents, handling **20k–50k PO/month**.
- > Implement and operate the full PO pipeline: multi-protocol fetch (REST API, flat-file), ZIP/PDF download with Zip-Slip protection, **GLN/GTIN and price-tolerance validation**, EDIFACT document building, and **secure SFTP delivery** to the Descartes platform (JSch).
- > Deploy and manage **Dockerized Spring Boot services** on Linux servers; author deployment, rollback, and runbook documentation used across the team.
- > Build a **monitoring dashboard for 22 Linux servers** with SSH-based health checks and automated **Telegram alerting**, sustaining **~99.9% pipeline uptime**.

Java 21 • Spring Boot 3.5 • PostgreSQL • JPA/Hibernate • JSch SFTP • Apache HttpClient • Docker • Linux • JUnit/Mockito

Software Developer @ Bank Mega

On-site • Jakarta

May 2024 – Oct 2025 • 1 yr 6 mos

- > Developed the **core loan system for credit cards**, processing **50k+ daily transactions** at **p95 latency < 200ms** on a **microservices architecture** with Spring Boot and Elasticsearch.
- > Built **QRIS payment solutions** and a **merchant management platform** integrated with EDC terminals; secured financial transactions with **end-to-end encryption**, Spring Security, OAuth 2.0, and JWT.
- > Optimized database queries and indexing for high-throughput, real-time payment and merchant data flows.

Java • Spring Boot • Elasticsearch • JDBC/JPA • SQL • Microservices • Spring Security • OAuth 2.0 • JWT

Quality Assurance Engineer @ PT Mitra Transaksi Indonesia

Contract • Jakarta

Sep 2021 – Feb 2024 • 2 yrs 6 mos

- > Performed **data analysis** and comprehensive **API testing** with Postman across financial products.
- > Conducted **performance testing with JMeter** and **penetration testing** to validate reliability, scalability, and security.
- > Developed **automation testing** to improve QA process efficiency and coverage.

Postman • JMeter • Penetration Testing • API Testing • Data Analysis • Automation Testing • SQL

Web Developer @ Freelance

Remote

Apr 2021 – Dec 2021 • 9 mos

- > Delivered end-to-end web solutions for multiple clients with a focus on **SQL database optimization** and clean, maintainable code.

JavaScript • SQL • HTML/CSS • Web Development

// projects

KEY PROJECTS

Bank Mega 2024 – 2025	Core Loan System — Credit Card Credit-card core loan platform on microservices; Elasticsearch-backed search across thousands of daily transactions.
Bank Mega 2024 – 2025	QRIS Payment & Merchant Management — Payments Real-time QRIS payment and merchant platform integrated with EDC terminals, over REST APIs with JDBC-backed persistence.
PT EDI Indonesia 2025 – Present	EDI PO Automation — Alfagroup / FFI — Supply Chain Automated pipeline converting PO from Alfamart/Alfamidi/Alfabean (REST + flat file) into EDIFACT ORDERS D:96A, delivered via SFTP.
PT EDI Indonesia 2025 – Present	SCM Monitoring Dashboard — Observability NOC-grade monitoring of 22 Linux servers with SSH health checks and Telegram alerting (Spring Boot + React/Vite/Tailwind).
PT EDI Indonesia 2025 – Present	PO Processing Services — LSI / KCSOFTEX — Supply Chain PO processing with flat-file parsing, SKU validation, and EDIFACT/XML generation for S/4HANA; fixed production parsing defects.

TECHNICAL SKILLS

PROGRAMMING	Java Advanced · JavaScript Int. · Python Int. · C++	FRAMEWORKS	Spring Boot · Spring Security · Microservices · REST APIs · JDBC/JPA
DATABASES	MySQL · PostgreSQL · SQL Server · MongoDB · Redis	SEARCH & STREAM	Elasticsearch · Kafka · Memcached · Swagger/OpenAPI
DEVOPS & INFRA	Docker · Kubernetes · Linux · Tomcat · AWS / GCP	CI/CD & OBSERVABILITY	Jenkins · GitHub Actions · Prometheus · Grafana · ELK
SECURITY	Spring Security · OAuth 2.0 · JWT · Encryption	TESTING & QA	JUnit · Mockito · Selenium · Postman · JMeter · Pen Testing · Allure
TOOLS & PROCESS	Git · Maven/Gradle · IntelliJ · Jira · Agile/Scrum		

// education

EDUCATION & CERTIFICATION

S1 Information Technology — Universitas Dian Nuswantoro	2014 – 2019
Focus: Software Development, JavaScript, Web Development, SQL · GPA 2.85/4.00 · Dian Nuswantoro Computer Club (DNCC)	
> Certified Software Engineer — HackerRank (Java, C++) > REST API (Intermediate) Certificate — HackerRank > Secure Coding — Online Course > Responsive Web Design — Online Course > Prompt Engineering for Everyone — Online Course > Python and Machine Learning for Financial Analysis — Online Course	

// strengths

CORE COMPETENCIES

ENGINEERING	OPERATIONS
> Microservices & clean architecture (SOLID, DDD) > RESTful API design & integration > Database design & query optimization > Security-first development (OWASP)	> Dockerized deployment on Linux > CI/CD pipelines & release management > Monitoring & observability (ELK, Grafana) > Production incident resolution
